In Obstetric Practice, and in those weakened and diseased states of the system, which frequently make life a burden to many of our most useful women, he has had unparalleled success with Water-Cure treatment.

NEW AND VALUABLE DISCOVERY.
Great Improvement in Artificial Teeth.
DR. J. A. KENNICOTT, No. 96 Lake street, having purchased ALLEN'S PATENT IMPROVED METHOD OF SETTING MINERAL TEETH, takes pleasure in offering to his patrons a REAL and SUBSTANTIAL IMPROVEMENT, which only needs to be examined to be appreciated, and unqualifiedly approved. The advantages of this invention are PERFECT CLEANLINESS and freedom from any metallic or other unpleasant taste, great strength, lightness and durability. The teeth are secured to the plate by means of a strong mineral cement, which forms a perfect union of the teeth and plate, and an EXACT IMITATION OF THE NATURAL GUMS, giving a life-like appearance that it is impossible to obtain in any other way. For references, see MEDALS and DIPLOMAS awarded to Dr. K. as premiums for the Best Dental Mechanism, also, specimens of work at his office, No. 96, corner of Lake and Dearborn streets, near the Tremont House. jy27

SOMETHING NEW.
AVERY great and decided improvement in the science of Dentistry, at Dr. W. H. KENNICOTT'S Office, need only be seen to be properly appreciated by any one who ever wore artificial teeth. One of the great points gained in this invention, is the entire union or fusion of the plate with the teeth, so that the whole is one entire piece, smooth as a china cup and as easily cleaned, there being no space anywhere for food to find a lodgment, consequently no offensive taste or odor will obtain from their use.
Wm. H. Kennicott having obtained Dr. Allen's patent and a full course of instructions from Dr. Taylor, of Cincinnati, is now prepared to offer a real improvement to the public.
OFFICE—120 Lake Street. jy1

Furniture and Chairs.
THE undersigned has leased Store No. 171 Lake street, for the purpose of transacting a Wholesale and Retail FURNITURE and CHAIR business. His warerooms will be completed and filled with a heavy stock in season for the early Spring trade, having now completed and in operation his new and extensive steam Establishment in manufacturing Furniture and Chairs of every variety of style and finish, adapted to city or country trade. Convinced by experience that manufacturing by hand, or on a small scale by imperfect machinery would not enable him to compete with Eastern markets, he has introduced every improvement in labor saving machinery requisite to despatch, durability and style. The manufacturing is conducted by Messrs. Rugg & Kimball, who are extensively known as efficient and practical mechanics, well acquainted with the wants of this market and the west generally, they pledge themselves that no articles shall be allowed to leave the Factory which they are not willing to warrant as superior in point of durability, workmanship as [illegible]

THE LONE STAR,
FOR THE SALE OF
STAPLE AND FANCY DRY GOODS
WILL BE OPENED FOR BUSINESS ON WEDNESDAY NEXT, 17th inst., at the New Store, No. 229 LAKE STREET, near the Bridge.
Money saved is as good as money earned.
The Subscriber bearing always in mind the above adage, has taken the fine, commodious Store mentioned above, for which he does not have to pay a small fortune yearly for Rent, the benefit of which shall go to the patrons of the LONE STAR.
The attention of the Ladies is particularly called to my stock of LONG AND SQUARE BROCH AND MERINO SHAWLS—some entire new style of centres. Also entire new styles Wool Shawls, which were landed at the Custom House in New York, within the last three weeks.
I would solicit a call from those Ladies who are in want of Silk Goods, Brocades, Grow Grans, Fancy and Plain Silks, etc. etc.
Dress Goods and Stuffs of every description, Cheap as the Cheapest.
The Goods at the Lone Star have all been purchased in New York since the late decline in prices. I have no old goods to palm off; and the advantage which I have over those who are paying from $1,000 to $3,000 yearly for rent, can be readily seen. I shall sell at a small advance from cost, for Cash only.
Ladies and Gentlemen are respectfully invited to call and examine for themselves, and they will find

That all the statements made above,
As strange as they may seem,
Are facts which I will to you prove,
And not an idle dream.

I hope at least to get a call
From all, both near and far;
I'll do my best to please you all,
While you remain at the LONE STAR.

producing an entirely new effect, far surpassing that attained in the ordinary quality of Ingrain and Three Ply.
The article produced is a TAPESTRY INGRAIN of superior beauty and elegance, the peculiarity of the invention consisting in the fact that it is parti-colored in the yarn, producing a new and beautiful effect. It has been patented both in this country and Europe, and bids fair to produce a new era in the history of Carpets. Specimens may be seen at the Carpet Rooms of

227 The Empire Clothing Store. 227
E. B. HURD & CO.,
HAVE opened the Store 227 Lake Street, which they are now filling with a new and complete stock of CLOTHING and GENTS. FURNISHING GOODS, which they now offer, wholesale and retail, at such prices as defy all competition.
E. B. HURD & CO. would respectfully intimate that having a large wholesale manufactory in Connecticut, from which they daily send out to all parts of the Union, an immense supply of every description of Clothing, they have facilities peculiar to themselves for supplying the public with a well made article, and of such style and workmanship as will insure the admiration of all who honor them with a call.
COUNTRY MERCHANTS, especially, will find it to their interest to give us a call before either making a purchase in Chicago or proceeding to any Eastern market. We can sell at New York prices, less insurance freight, and the expense of a journey to that city. Our goods are made by desirable workmen and at less expense than they can possibly be made for in a new city. As our terms are prompt payment and small profits, none of our customers will have to pay for other people's bad debts.
E. B. Hurd & Co. intend to make their establishment really The Empire Clothing Store, which shall be worthy the patronage of Gentlemen of refined taste, and where the farmer and the mechanic will be able to obtain the cheapest and the best of Cloths.

Merchant's Exchange Clothing
WAREHOUSE.
WE would say to our customers and dealers in Clothing in general, that our Stock this Winter will be fully adequate to the wants of the trade, embracing every style and quality of Garments, which we are prepared to offer at Wholesale and Retail, upon as reasonable terms as can be had at the East, being connected with a House in New York city, having buyers of long experience constantly in the market, and being Practical Tailors ourselves, thereby doing away with many expenses necessary to others, enable us to get up our goods as well, and at least at as low prices as others. Those going East to purchase are invited to call on Wm. Dunn & Co., 163 William street, or we pledge ourselves to sell in Chicago at Eastern prices; the difference in expenses here will fully pay transportation. Dealers will find it to their advantage, we think, to purchase here on account of transportation and frequent delays, as well as keeping up a better assortment of sizes, etc., with a less stock by sorting up frequently through the season.

CHICAGO DAILY TRIBUNE

The Publishers of THE TRIBUNE deem it not inappropriate at this time to make a brief statement of their purpose and plan.

1. The first essential of a good Daily consists in its being a Newspaper, news—accurate, reliable, varied and fresh is its life blood. The furnishing its Readers with the latest and best information, of each of the manifold changes, incidents and developments occurring throughout the world as are of special interest to the people of Chicago and the West, will be the leading characteristic of THE TRIBUNE.

2. The candid and thorough discussion of those principles which underlie all facts, is also an essential of a good political journal. In this department THE TRIBUNE will strive to uphold the Truth and the Right. Established on an independent foundation, it will seek to maintain its position by the fair expression of its sentiments, yet decided opinions. It will defend whatever it regards as lawful, just, and sound, and discountenance all that is false, factious and fraudulent.

3. For the efficient carrying out of its design, THE TRIBUNE is arranged in eight Departments, to each of which a competent and responsible person is wholly devoted. Of these, the Commercial Department is under the exclusive charge, as always, of T. A. STEWART, Esq., one of the founders of THE TRIBUNE, whose established reputation throughout the West, as a Commercial Editor, saves the necessity of commendation. The Home Department, which is edited by a Lady, has been added lately for the sake of making THE TRIBUNE a welcome visitor at the Home Circle, as well as to the counting room and the office.

4. Arrangements are completed for Correspondence from New York, Washington, Philadelphia, Baltimore, Boston, Cincinnati, New Orleans, St. Louis, and the Capital and larger towns of our own and neighboring States. Letters will be received also, during the year, from at least four regular correspondents in Great Britain, France, Italy and Germany. THE TRIBUNE'S corps of Letter Writers has been made up with care, and includes gentlemen of undoubted ability, accomplished education, and high standing in the country.

5. THE TRIBUNE will support a system of national policy that shall defend our honor abroad and maintain our credit at home. It will advocate a discriminating Protective Tariff, Harbor and River Improvements; the donation of the Public Lands to actual settlers, the solution of agitating Foreign Questions by honorable negotiation, unembarrassed by lawless encroachments; direct appeal to the People, so far as possible, on public questions and public officers; and the leaving the South to bear the heavy burdens and heavier responsibilities of its peculiar institution, without irritating interference by the North for its removal, or aid from the National government for its extension.

Its hope of a high destiny for this Land of Freedom, founded on its Faith in Progress as the best Inspirer, in the Past as the best Teacher, in the People as the best Sovereigns, in Whig Principles as the best Policy, in Republicanism as the best System, in Christianity as the best Regenerator, and in the West as the great arena.

DICKENS STORIES.

THE DOCTOR'S STORY.

A Forgery and a Wedding.

The circumstance which I am about to record was one that, at the time of its occurrence, made a strong impression upon me, and even now sometimes comes across my mind, bringing with it a strong feeling of what deep and dreadful injustice might be done to an individual who possessed not sufficient moral courage to take those steps, which were necessary to his own redemption from evil attempted to be thrust upon him.

It so happened that I was in attendance upon a family professionally, for some years, where there were several daughters, and out of compliment to me I presume, I was invited to the wedding of one of these young girls, with a gentleman every way worthy of her, as regarded habits manners, and educataion : although, unhappily, he did not possess that amount of "virtue" he would have dispensed so well, and which, somehow or another, gets into wrong hands.

It is all very well for foolish, unthinking people who form this fault, to presume to say that learning is better than house or land; but others, who know the world, would have no difficulty whatever in making a choice. Those who are at all practically acquainted with society, know that it is not education, or manners, or talent, that makes the man—but money.—The question now asked concerning anybody is not "What is he?" but, "What has he got?," and if the answer can be "Money," he of course, becomes possessed of every virtue under the sun. But to return to my tale.

Mary Dempsey, then, was about to be married to Mr. John Sinclair, who, as I have observed had the learning, but alas! not the house and land, which the unthinking make so light of. In fact, he was a man of good talent, making a living by the exercise of that talent; and it was no difficult matter to promise that he was a man who, in due time, was highly calculated to become famous and celebrated for his acquirements. He won the heart of Mary Dempsey. And that was indeed, to my mind, a conquest worth the making; for a gentler, fairer being never had its birth.

Before the marriage, I happened to be mentioning the matter to a *friend*, and he said, when I uttered the name of the bridegroom—'Sinclair! Sinclair! bless me! Did you say Sinclair? Is he a young man, a—a good looking expression of countenance?'

'Yes the same.'

'Oh, well, there's something wrong about him.'

Something wrong! What, is he out of his senses? I never saw a much better head in my life. There must be something wrong about you to say so.

'Oh, no! I cant tell you what it is, exactly, but I know that I have heard something or another that I cannot exactly call to mind. It's very provoking to chase a thing through your memory, but really—what can it be? it's something, however, against him, I know.'

It cannot be anything very important, then, as you have forgotten it; and I would suggest that you ought to be very careful, indeed, how you say anything of the sort against anybody. You don't know the incalculable injury it may do.'

'Oh, I won't say anything against anybody—not I. But now I perfectly recollect it was Smith who told me there was something or another that he had heard from one Jones.

'Now, really, this is too bad.'

Oh, no, it ain't too bad; and now I have recollected it, I'll ask Smith when I see him, what it really was now; and if he can tell me, I'll let you know, and then you can judge for yourself. Upon my word, I feel uneasy about it; and for the sake of Mr. Sinclair, it ought to be sifted, you see.'

'Very well, very well, do as you like in the matter. I don't think such vague charges ought to be made against any one, and if I had been you, I would not of said anything about it. I don't mind saying so, because I know you would not do an injury to any living creature, except through carelessness, and careless I know you are.'

The short conversation I had with my friend left an unpleasant sensation on my mind, with reference to Mr. Sinclair, and when a note came to me by post the next day, the superscription of which I knew to be in the handwriting of my friend who had the unknown charges against Sinclair, I opened it with some eagerness, and read as follows:

'Dear——. I have seen Smith, and found out all about Sinclair. His brother was transported. What do you think of that now, my dear fellow? The idea of a young lady marrying anybody belonging to what may be called *transportable* family! isn't it dreadful. It was some forging business.

Yours, in haste. GEORGE LUPINGTON.

P. S. Don't say I said it.'

This note gave me some uneasiness, although, if Mr. Sinclair had twenty brothers, and the one half of that number had been hung, and the other half transported. I could not, for the life of me, see that it constituted any charge against him. But I knew that I was on such points rather singular, and it gave me some uneasiness to think that this matter might seriously affect the prospects of good Mr Sinclair.

I went to the wedding. All was in readiness; all was sunshine, joy, expectation and hilarity, until the time arrived when the bridegroom ought to have made his appearance.—And lo! he came not! Minute after minute flew by in anxious expectation, and at length the bride burst into tears, and declared that something must have happened to him, and implored some of the gentlemen to go and make inquiry for him. One of her sisters, however, interfered, saying—

"Mary you ought to feel by far to indignant to sent after your bridegroom. The insult of his being now five minutes too late, should be sufficient to eradicate him from your thoughts.

"That sentiment does you a world of honor. Miss Dempsey,' said I;' 'and if you will permit me to go and make inquiry for Mr. Sinclair, I shall go, I think, in the spirit you would wish me.'

She thanked me by a look, and I left the house. Luckily this affair did not take place in the church, but in the house of the Dempseys, where although it was a little contrary to custom to do so, the bridegroom had agreed to meet the bride, and accompany her to the shared edifice.

I had the address of Mr. Sinclair given to me, and it was not three streets off where he lived in chambers. I walked there, and knocked at the door, on one side of the staircase, which bore his name upon the pannel. For a few seconds there was no answer, although I heard some one move in the room; and then I knocked again rather sharply, when the door was opened by Sinclair himself; and I think I shall never forget the look of unutterable woe that was upon his countenance.

'Mr. Sinclair,' I said, 'if this is an introduction, I hope you will pardon it. I come from Mary Dempsey.'

He did not speak, but stretching out his hand, he took hold of my arm, and led me into the chamber. Then when the door was closed, he said, in nervous and excited accents—

"Tell her to forget me! beg of her to forget me!'

"But what for? You have gained her affections, and it is a very strange thing now for you to make such a request.'

"It is a desperate thing, and under many circumstances, would be a wicked thing, doctor.—But I am doomed. Something has happened which may, and which I dread will involve me in disgrace. She shall not share it with me if I can help it"

I was silence for some moments, and then replied, in is impressive tone as I could assume—

'Mr. Sinclair, beware, of what you do. Your own fate in life—your happiness as well a the happiness of the fair and intelligent girl whose affections you have won depend upon your conduct. If you have yourself committed any act that ought to make you hesitate about yoking the fate of another with your own, say so; but if you are a victim, instead of guilty, I implore you to summon courage to your aid, and do not allow yourself to be borne down by any amount of circumstances.'

These words of mine seemed to have a great effect upon him. He staggered to a seat, and covering his face with his hands, for some moments appeared lost in thought. Then suddenly he said—

'Heaven knows I am guiltless!'

'That is enough,' I said. I will believe you. And now, it is a strange thing to ask, but will you take me into your confidence?'

'I will.'

'Agreed. I will now go and calm the fears of Mary, and return to you immediately.'

I accordingly went back to the Dempsey's house and, said aloud—

'I have seen Mr. Sinclair, and a circumstance which he will write an explanation of, to Miss Dempsey, forces the putting off the marriage for a short time. He is well, and the circumstance is one that cannot be explained without prejudice to him.'

I perhaps did go a little too far in saying this much, but however I had faith in the man, and I was amply rewarded by the look of gratitude, that was cast upon me by Miss Dempsey, who immediately said—

'I am quite satisfied.'

The guests were rather wonder-stricken at this state of things, and some of them put on such stupid looks of wonder that it seemed doubtful whether they were awake or not. The ladies were of course indignant, for they had dressed themselves all for the occasion, and now for there to be no Wedding at all, was too provoking. How they settled it among them after I left, I do not know, for I got away as quickly as I could, and hurried back to Sinclair's chamber, who seemed wonderfully calmed by the assurance I brought him, that even what had just happened had not shaken the confidence which Mary had in him; and then he cried—

'Oh! can I ever be worthy of such a creature?'

'Yes,' said I, 'you can certainly be worthy of her if you choose.'

'I cannot, I cannot. How am I to do so? when you have heard, which you shall hear, the melancholy circumstances by which I am surrounded, you will admit that I no longer ought to think of Mary Dempsey as a wife.'

'And yet you say you are guiltless.'

'I am, I am. But know you not that I have seen enough of this world to know that, in order to preserve a fair fame, it is not enough to be innocent, but you must manage to seem so likewise, or you will not escape the very worst of censures?'

'I certainly know that the world is a censorious world, but I know, likewise, that we are always the worst judges of what affects ourselves, and then, let the circumstances be what they are, our imagination is apt to dress them up in false colors, giving an importance to them which they do not deserve.'

He looked at me with something like hopefulness in his countenance, and I proceeded:

'Mr. Sinclair, it strikes me strongly that you are allowing your imagination to get the better of your reason, and supposing yourself to be involved in some affair, from which extrication would be easy, with a little more resolution than you possess.'

'Think you so? but you cannot judge until you know all; and all you shall know, if you will do me the favor to listen to my recital.'

I signified my assent, and at the same time expressed what pleasure it would afford me to be of service to him; after which he began as follows—and I can only inform my readers that the tale is most strictly true.

'Sir,' said he,' 'about ten years ago I was in a far more precarious situation than I am now, for I was too young then to have found out my real powers, and was, as it were, floundering about without a profession, and being first one thing and then another, in the hopes of making a livelihood. I was unfortunately situated in my bringing up.'

* * * * * *

'You may depend,' said I, that as the world advances in knowledge these things will be better understood. But proceed with your story, Mr. Sinclair.'

'Well, then, after my father's death there was evidently a coalition got up between my mother, her darling, the eldest, and his ever-pleasant Alfred, so that George was made to look after himself; and I candidly confess, that whether from eductaion or from natural bias, he had some bad qualities about him. For myself, I was hustling about, and trying to get a living where I could, by turning to account what artistic and scientific knowledge I had, and fagging hard to acquire more. Thus some years passed, until one day George, who had learned copper-plate engraving, came to me—for I was the only one who had held out a friendly hand to him—and said:

'A hair-dresser has employed me to engrave for him one of those 'Bank of Elegance' notes which are used as an advertisement by many tradesmen, and as he wants it as like as possible to a real Bank of England note, can you lend me one for a day of two to copy?

'I thought nothing of the application, except that I had not the note, but I attempted to borrow one unsuccessfully, and in the end master George had to wait a day or two until I could accomodate him, and then I lent him a five pound note, which he promised to bring me in a day or two. Now, except that I wanted my note, I thought nothing of this after all, for the whole thing was so natural and clear, because the whole town, and particularly the hair-dressers shop windows, were full of these 'Bank of Elegance' notes, offering a thousand pounds, and so on, to any body who could cut hair better than Tompkins, in Fizzle lane. The day or two passed away, and then one morning George called upon me.

'Here is your note,' said he. 'It is all right.'

'What is all right?' said I.

'Oh, nothing particular. I don't intend to be poor any more.'

'A worthy resolution,' said I; 'but the only difficulty remains in the execution.'

'Ah! well,' said he, 'Good morning. All is right. You will see perhaps in time what will surprise you.'

☞ On the day previous to the inauguration of Gen. Pierce, a long slab-sided genius, with a very high shirt collar, and an evidently flattering opinion of his own abilities and consequence, after spending some time in criticising, with the self sufficient air of ignorance, the architecture of the Capitol, which seemed rather below what he supposed must be the higher orders of the art, turned to the superintending carpenter, and inquired the purpose of "the alley way." The carpenter surveyed him a moment, as if to measure the length of his ears, and replied, to the great amusement of the by-standers, that it was designed for the protection of Gen. Pierce's life. "Dod rot it," said his interrogator, "there aint nobody goin to tech him, is there?" The waggish mechanic rejoined, that there were such an everlasting sight of desperate Whigs about, that it was feared they might hatch up some sort of an infernal machine, if they could get near enough to use it; the thing was tried on twice with old General Jackson, and General Pierce's friends did'nt like to run the risk.—"Capital idea! capital idea!" exclaimed greenhorn; "them Whigs is orful papers; darned ef I don't hev my six-shooter around at the 'auguration."

☞ A lazy, over fed lad, returning from dinner to his work, was asked by his master, "if he had no other motion than that?" "Yes," replied the boy, drawling out each letter, "but it's slower."

Summary of News.

THE NEW YORK PAPERS OF MONDAY BRING US the details of the European news, by the Baltic and Cambria. It is quite interesting, as it appears the disturbances in Italy had not been entirely quelled, as was supposed to have been the case at last advices. However, the army is at this time too powerful to permit even the most sanguine of the conspirators to entertain a hope of success, although fresh but slight discontent has manifested itself in various quarters since the outbreak of Milan. Mazzini had located himself upon the borders, and is said to have forwarded large sums to the chief conspirators to aid them in the cause; but finding that the police were in pursuit of him, he suddenly disappeared. Another and extensive conspiracy to overthrow the Austrian dynasty, is reported to have been discovered in Hungary. A fruitless attempt to assassinate the Emperor of Austria, will probably cause the reins upon the unfortunate Magyars to be drawn more tightly than ever. Kossuth has written a letter *denying that the proclamation, published a few days ago to the Hungarian soldiers, was either penned by him or by his authority.* His reason for not giving an earlier denial, he says, was, "that my disavowal would, of course, have been telegraphed to Austrian quarters, and supposing the fight in Italy still pending, might possibly have done some harm to my beloved brethren in opposing the Italians. So I took it to be my simple duty rather silently to submit to any virulent indignity, than to harm the chances of the struggling patriots at Milan, who, though inconsiderately, and at an ill-chosen moment, risked their blood and life and their sacred honor to free their country from insupportable oppression, and that a foreign one, too—just as England once rose, and risked blood and life and sacred honor; nay, more—sent one king to the scaffold, and one other into eternal exile—to free herself from oppression, though it was not a foreign one." We are sorry to hear of the renewal of hostilities between Turkey and Montenegro. The people of the latter country are said to be receiving assistance from the Austrians. Rumors are current of a proposed alliance between France and England, and one or two minor States, to prevent the encroachments of the Northern powers.

THE CASE OF THE MADIAI FAMILY, STILL IMPRISONED in Tuscany, continues to attract attention both in England and the United States. We publish this morning an interesting letter from Lord Russell in regard to this interesting family.

AT THE LAST ACCOUNTS, SAYS THE NEW YORK Herald, the civil war was still pending in Buenos Ayres, the city was in a state of siege, and the condition of the inhabitants was deplorable in the extreme.

HONORA CORCORAN, THE IRISH GIRL WHOSE MYSTERIOUS disappearance was the cause of the recent riotous proceedings in Charlestown, Mass., has returned to that city in charge of her mother.—She was taken to Philadelphia, and there remained till brought away by her parent.

ABOUT FIVE THOUSAND OF THE MOST RESPECTABLE citizens, comprising men of every class and profession, assembled in Metropolitan Hall, New York, on Saturday evening last, to adopt measures for securing a reform in the City Government, and petitioning for an amendment of the Charter, to separate the Executive and Legislative officers. Vice Presidents were appointed to represent the various professions and trades.—Peter Cooper, Esq., presided. The meeting was addressed by J. M. Girard, H. J. Raymond, and Hon. B. F. Butler.

THE BALTIMORE STRIKERS ARE IN GOOD SPIRITS yet. The material aid flows in from all sides.—The Treasurer announced, on Friday night, the late receipt of over $1,100, and letters were read from Philadelphia, giving assurance that $5,000 will be forthcoming when needed. On the same day, the workmen in the Mechanic Mills in Lowell struck for an unvarying ten-hour rule the year round.

A ROCHESTER DRUGGIST COMMITTED SUICIDE ON Saturday last. He was elected Alderman last Tuesday.

IT IS STATED AT NEW ORLEANS THAT THE PEOPLE of San Juan were armed and threatened to demolish the Vanderbilt Transit Company's depot, on account of its monopolizing trade.

A LETTER DATED BATAVIA, DEC. 29, STATES THAT there had been no less than nine failures during the month among the Chinese merchants in that place. Two of the failures were considered the wealthiest and most substantial Chinese houses. The known liabilities are about one million of Spanish dollars, while their assets are not expected to realize one-half the amount of their debts. It is feared that there is more to come.

NAPOLEON'S ADDRESS, ANNOUNCING HIS MARRIAGE, is published in the Russian journals; but, in translation, is *very* ingeniously deprived of its sarcasm. The word *parvenu*, for instance, is translated "non-hereditary position," so that one of the most telling points in the speech reads, "I acknowledge my non-hereditary position before the whole of Europe!"—a very different meaning from that which Napoleon expressed.

A NEW TERRITORY WITH THIS DESIGNATION WAS created, and provision made for its organization, by an Act of Congress approved on the 2d inst. It comprises that part of Oregon which lies north of the middle of the main channel of Columbia river, to where it crosses the 46th degree of latitude, and thence along said degree of latitude to the top of the Rocky Mountains. The land occupied by missionary stations, not exceeding 640 acres to each, together with the improvements, is expressly reserved and confirmed to the Missionary Societies respectively which established the same. Stations that were so occupied prior to the passage of the Act organizing the Territory of Oregon, as also confirmed to the Societies which established them, even though they have since been abandoned.

A STEAMBOAT CALLED THE PARISIAN, LATELY burst her boiler on the river Rhone, by which accident several lives were lost, chiefly of her engineers. It is stated that this is only the second case of explosion which has happened on a French steamboat, the first having occurred at Lyons during the early experiments with steamboats.

THE CLEVELAND AND PITTSBURGH RAILROAD CO. were mulcted in $5,000 damages, lately, for causing the loss of an arm to an orphan boy at Ravenna, eighteen months since.

GOV. BIGLER HAS SIGNED THE BILL PASSED BY the Pennsylvania Legislature, closing the several trusts of the United States Bank, and settling the judgments obtained by the State against the Bank on account of *bonus*. The Bank is to pay the State $150,000. By closing the trusts, the Bank gets rid of a large and useless expense, and, by compromising the judgments lying against it, removes a weight that would forever keep it in the dust. The Bank has several hundred thousand dollars worth of property after paying the $150,000 named, to the State.

MISS KATHLEEN FITZ WILLIAMS, THE BEST BALLAD singer in England, visits the United States in the autumn. She accompanies the Jullien troupe.

THE DECISION OF A CASE IN THE SUPREME COURT of the U. States, will secure to the heirs of Kosciusco about $60,000.

A SINGULAR DISCOVERY IS GIVEN BY A CUBAN correspondent of the Raleigh Standard. Dr. Tinsley—an English practitioner of long experience in Cuba, and a graduate of Paris—has discovered, in the course of his practice in cases of small pox, that vaccine virus, after having once passed through a negro's system, becomes useless as a preventative to the white race.

MISS CATHARINE E. BEECHER HAS OFFERED TO ENDOW the professorship of a Female Seminary in Dubuque with the sum of $20,000, and also to furnish books and apparatus to the amount of $1,000, provided the citizens of Dubuque will erect a building and guaranty a certain number of scholars. The proposition has been accepted, and a committee appointed to solicit donations.

MEDARY, THE CLERK IN THE OHIO LEGISLATURE, recently used his position to stop the reading of a bill in its regular order, which was objected to by the member who introduced it, Mr. Barnum, of Cleveland. The clerk undertook to be very abusive, because the member insisted on his rights, and finally, went and borrowed a crutch from a member who used one, and walked up to Mr. Barnum and felled him, by striking him a violent blow on the head. Barnum was senseless when taken up, and it is feared is badly hurt. He left for home immediately. Medary was put under arrest, and will be expelled.

European Correspondence.

LONDON, Feb. 15, 1853.

To the Editors of the Daily Tribune:

One abundant reason for enjoyment with every American in visiting England, is the warm reception extended to him, and the cordial good feeling with which he hears our country talked about. I am told that with a considerable proportion of the titled aristocracy, this friendship towards us does not exist. Whether as a class they would naturally be expected to have longer perpetuated amongst them the inimical feelings engendered by the revolutionary and the last wars, or whether they regard with envy the rapid progress the United States are making in the march of nations, and fear what may ere long, be the consequence to themselves from witnessing so striking an example of republican institutions, shorn of the evils of entailments, and of the enormous expenses of the church, and of the monarchial government, it is impossible to judge. Probably both these causes operate to some extent.

But even among the nobility, our country has many an admirer and warm friend, who rejoices in this glorious example of free institutions; and in the grade, which would be called next below, which is in reality the best English society, the strength, the life, of this great and wonderful nation, we have sincere, devoted friends, few of them, comparatively, being otherwise. In this class I mean to include generally, all branches of business men, as merchants, manufacturers, and bankers, also those in the professions, and many living upon their property, either inherited or acquired. Doubtless exceptions and numerous exist, but I am happy to be able to say, that of the several hundred I have had the pleasure of conversing with, some of whom were not even known to me by name, not one has expressed anything but cordial good will, and high admiration.

To a considerable degree we are indebted for this state of feeling, to that wonderful non-descript, the "*Times*." The power and influence of this newspaper upon the British mind, no American can understand without coming here, and watching the current of events for some considerable time. Its resources of wealth and intellect are unlimited. As an illustration of the former, let me relate an incident given by an intelligent, reliable friend. Several years ago, the Times brought by express, some important intelligence from the East Indies, at an expense of some £60,000, ($300,000.) So valuable was the information, the Government offered to defray the cost of the express, but the *Times* declined, returned its thanks, and informed the government that it was able to meet its own expenses, and when further intelligence was required, it could furnish it in the same way. The same friend, too, informed me that a year or two since a gentleman wrote an article which he desired to have appear as editorial, and enclosed £100, ($500,) to the editor, with his article and note explanatory of his wishes. The editor published the letter, signature and all, with a serio-comic editorial, remarking, that though every man might have his price, yet it was a little remarkable that a person should expect to buy the *Times* for £100.

In its editorial department and its correspondence, it employs the first intellects of the day, and no expense is spared to procure information. It is besides the receptacle of valuable communications of every kind. Being the paper universally read, it has probably more readers than all the rest of the British papers united—every one is desirous to have his articles published in it, and one of its writers informed me that they rejected enough communications every night to fill two or three of their immense sheets. Having their pick out of such a mass of information, and engaging itself chiefly in what for the time being occupies public attention, it is as its name indicates, a paper *for the times*, and stands out as by far the most influential journal not only in Great Britain, but in the world.

Most fortunate is it for our country that we have in this powerful organ a warm and reliable friend, having more correct information relative to our government, habits, institutions, resources, &c., than appears in any other British publication. It is true this friendship for the United States dates back only to the great Exhibition of 1851, but there is every prospect of its continuance; and tho' it does not lead them to commend us in our faults, yet we are usually defended as far as we deserve, and as in the case of Uncle Tom's Cabin, the Stafford House Address to American Ladies, &c., they are generally on the right side, and understand matters sufficiently well to give a fair explanation to their readers. This question of Slavery, the Stafford House Address, &c., I desire to speak of at more length, and must pass it over in this communication.

The winter here has been most remarkable.—From my arrival the 22d Nov. till the 1st Feb., it *rained every day* with two or three exceptions, and there has been no frost till the last few days. When it is remembered that London is almost 12 deg. north of Chicago, this fact seems wonderful. The smaller degree of cold here as compared even with the climate on the continent several degrees south, can only be accounted for, I believe, by the current of the Gulf stream setting against this Island. But I am informed it is seldom that so rainy and mild a winter is experienced.

You will have seen a notice of the terrible disaster to the Queen Victoria Steamer in Dublin Bay, by which about 70 lives were lost.

The Madiai are exciting much interest here. In Parliament last night a most interesting debate was held upon the question. I enclose you a copy of the *Times* containing it, and ask your attention particularly to the speech of Lord John Russell, and to the article by the editor.

Yours truly, J. S. W.

THE GREAT WEST—Historical Recollections, Vol. 1. Published by Henry Howe, Cincinnati.

This is a large work of about 450 pages, very attractive in name and appearance, having many engravings, clear type, and treating of events and scenes of great interest. The author's faithful delineations of the life of the early settlers in the Great West, is exciting, and gives evidence of truthfulness and patriotism. It is well to be frequently reminded of what our Fathers have suffered in those very places, where now we meet peace and plenty. The succeeding volumes will no doubt be as readable as this.

In the Appendix are found historical and descriptive sketches of Oregon, New Mexico, Texas, California, &c. Mr. Henry Howe, the author, is already known as having published interesting historical collections of Virginia and Ohio.

☞ One of the prisoners in the Jail in this town escaped last evening through the door, by seizing the young man, when he opened it to empty an armful of wood, jerking him inside and then springing out himself. He was retaken in a short time afterwards a little distance to the southwest of the jail.—*Rockford Forum.*

MINING.—We hear of a great deal of "prospecting" in all parts of the Mines, and when this is done extensively, many discoveries are sure to be made. Those who pretend that the mines are exhausted make a mistake. All that is wanted to disclose the hidden mineral wealth of this country is a sufficient price to encourage the adventure, as will be seen, *if* the price of the ore continues near the present range.—*Galena Adv.*

Beloit and Madison Rail Road.

Editors of the Tribune:

I notice an article in your paper of this morning under the head of "Wisconsin Rail Road," copied from the *Milwaukee Wisconsin*, which says, "a well informed gentleman, writing from the Capital, among other things says that he has good reason for supposing the Beloit and Madison Road will be urged right forward to completion. The Milwaukee Road will be finished to Madison about one year in advance of any other Road, and that this City (Milwaukee) may hope to secure the business of Central Wisconsin."

This last sentence I feel a disposition to dispute with our honorable friends of Milwaukee. The Beloit and Madison Road may reach Madison as early as the "M. & M. R. R.," and Chicago will then compete with Milwaukee for the trade of Western and Central Wisconsin on fair terms. What say the business men and property holders of Chicago? Are you ready for this honorable race to the Capitol of Wisconsin? If you are, come boldly up to the aid of the Beloit and Madison Rail Road Company, and not allow it to linger and rest on the hands of comparatively few of our citizens. CHICAGO.

Denmark and the Orkneys.

EDS. TRIBUNE:—I saw lately in one of your papers that a lecture had been delivered in New York, stating that Denmark on payment of a certain sum could redeem the Orkneys. This is a mistake. The Orkneys have never been subject to Denmark, but to Norway. In 1397 a Union called the Calmar Union, was formed between the three Kingdoms, Norway, Sweden and Denmark, under one visible head, but the sovereignty of each country to be recognized and respected of the other. This triple Union lasted 125 years, when Sweden seceded. In the meantime King Christian the 1st, one of the Kings under the triple Union, did, "as King of Norway," give the Orkneys and Hebrides in security for a dowry of 60,000 gilders due to James the Second, King of Scotland, who married his daughter. The imbecility and poverty of the succeeding Kings of her race prevented the redemption of the Island, and they are still in a *statu quo*. I wish that some lecturer would inform the public on the influence of the Normans or Norwegians on the now so powerful Anglo Saxon race. It strikes me that the conquest of England by the Normans contributed more than any thing else to the elevation and power of their race. The Saxons were indeed an imbecile people, superstitious and effeminate. The Normans were chivalric, enlightened and brave.—The denomination of "Englishman" from being uttered in derision, and as a weak name, became an honorable name that many were proud of—This, Sir, is my view of the subject, and I wish that some one would make a better exposition of these views, as they formed a great theme for the lecturer. Yours,

CHARLES WILSON.

The Madiai Question in England.

In the foreign files by the last steamer, we have the full report of the late interesting debate in the House of Commons on the case of the Madiai. The London correspondent of the N. Y. Times says that "Mr. Lucas, the ex-Quaker Catholic, had the hardihood indirectly to defend the course pursued by the Grand Duke of Tuscany, by quoting what he called cases of Protestant persecution in Switzerland and Tahiti.—He was met by a crushing reply from Lord Palmerston; and the speech of Lord John Russell was also very satisfactory in vindicating the principles of religious liberty. His Lordship, however, has done more than make speeches, for he has instructed Mr. H. Bulwer to remonstrate firmly with the Grand Duke on this outrageous infringement of the rights of individuals on the religious ground of reading the Bible." We give below the letter of Lord John Russell to Sir Henry Bulwer:

The Case of the Madiai.

The case of the Madiai was brought before the British Parliament on the 17th ult., and led to a long debate. The following striking letter was published in a Parliamentary paper on the 18th ult.:—

LORD JOHN RUSSELL TO SIR HENRY BULWER.

"Foreign-office, Jan. 18, 1853.

Sir—According to the last accounts received from you, the Grand Duke of Tuscany still hesitates on the subject of the Madiai.

But this is a matter on which hesitation implies capital punishment. It is the same thing in effect to condemn a man to die by fire like Savonarola, to put him to death by the slow torture of an unhealthy prison.

It seems to be imagined, indeed, by some governments on the continent, that if they avoid the spectacle of an execution on the scaffold, they will escape the odium to themselves, and the sympathy for their victims, which attends upon the punishment of death for offences of a political or religious character.

But this is an error. It is now well understood that the wasting of the body, the sinking of the spirits, the weakening of the mind, are but additions to the capital punishment which long and close confinement too often involves.—If, therefore, as has been lately reported, one of the Madiai were to die in prison, the Grand Duke must expect that throughout Europe he will be considered as having put a human being to death for being a Protestant. It will be said, no doubt, that the offence of Francesco Madiai was not that of being a Protestant, but that of endeavoring to seduce others from the Roman Catholic faith; that the Tuscan government had the most merciful intentions, and meant to have shortened the period of imprisonment allotted by law to his offence; that such offences cannot be permitted to pass unpunished.

All this, however, will avail very little.—Throughout the civilized world this example of religious persecution will excite abhorrence.—Nor will it be the last of the reproaches addressed to the government of the Grand Duke that the name of Leopold of Tuscany has been thus desecrated, and the example of a benevolent sovereign thus departed from. The peaceful, mild and ingenuous character of the Tuscan people makes this severity the less necessary and the more odious.

As this is a matter affecting a Tuscan subject, it may be said that Her Majesty's government have no right to interfere. If this means that interference by force of arms would not be justifiable, I confess at once that nothing but the most extreme case would justify such interference.

But if it be meant that Her Majesty has not the right to point out to a friendly sovereign the arguments which have prevailed in the most civilized nations against the use of the civil sword to punish religious opinions, I entirely deny the truth of such an allegation.

You are, therefore, instructed to speak in the most serious tone to the Minister of Foreign Affairs, and to lay before him all the considerations stated in this despatch. You will do it in the most friendly tone, and take care to assure the government to which you are accredited, that none are more sincere in their wishes for the independence and happiness of Tuscany, than the Queen of Great Britain. I am, &c.

J. RUSSELL.

Atkin's Raker in England.

The prospects of the success of Mr. Atkin's ingenious Raker in England, are very flattering. From the *London Times* of the 12th ult., we take the following notice of it:

NEW AMERICAN REAPING MACHINE.—An American millwright, named Atkins, residing at Chicago, has recently invented a very remarkable piece of mechanism for the purpose of making the reaping machine, after cutting corn, deliver it in bundles ready for the binder. This was the great desideratum of the machine as first brought over to this country and shown in Hyde Park; nor have our implement makers, though they introduced some important improvements, succeeded in supplying the want thus indicated. Atkins, who, it appears, has been bedridden for 10 years, designed an automaton arm, terminating in a rake, which, as the reaper moves along regularly sweeps the cut corn in sheaves off the board on which it has been deposited, drops each parcel at the side by a rotatory movement, and then, extending itself, returns to its work again. Whether the invention will stand the test of experiment in the field remains, of course, to be seen; but some of our most eminent agriculturists regard it with great interest, and appear to entertain very favorable expectations of its performance. The mechanical arrangements by which the automaton action is secured are remarkable for their novelty and simplicity, and those who wish to see them should go to the Polytechnic Institution, where the new reaper is exhibited by Mr. J. S. Wright of Chicago, Illinois. This machine, which is built on M'Cormick's model, also contains a clever modification of the cutter, which, it is said, entirely overcomes the tendency to clog in damp weather or on unfavorable ground.

☞ One of the most singular things in the world is, how men came to chew tobacco. It is not only dirty and disagreeable, and spoils your breath, mouth and shirt bosom, but it contains a "pizen," as deadly as that vended by a rattlesnake; and yet in spite of all this, there are people who prefer it not only to guano but to nectar, and actually roll it under their tongues as a sweet morsel. Some men have no idea of any bliss more exquisite.

Italy—Austria—Hungary.

From papers by the Baltic.

ITALY.—From Milan, under date 13th, we learn that Marshal Radetsky had published a second proclamation in which he orders the Judicial authorities to sequestrate the property of those persons who shall render themselves directly or indirectly, accomplices in treasonable practices.—By an other proclamation, the University of Pavia has been closed until further orders. Slight disorders had broken out at Forli and at Arezzo, in the Roman States. The *Gazette de Basle*, of the 16th, announces that all communication between Lombardy and Ticino is interrupted the passage of travelers, and even merchandize and corn, being prohibited upon that frontier. There were 4,000 Austrians on the line of Como, and 1,200 on that of Vareme.

According to a letter in the Genoa *Journal*, Mazzini had been seen and recognized on the Ticinian frontier, whence he had sent large sums of money to the disaffected in Monza, Como and Bergamo. Saffi had appeared only at Ticino, but succeeded in making his escape when the police came to arrest him. The Federal Council of Switzerland has sent Col. Bourgeois to examine and report upon the real state of affairs, and hopes were entertained that the blockade would be raised, and the export of corn, at least, would be allowed. Travelers and merchandise are now compelled to take the route by the Splugen.—Letters from Milan to the 15th, say that there was still great difficulty in obtaining access to, or egress from the city. Baron Martini, the Military Commandant, had threatened to punish severely any person raising cries, singing or whistling in the streets. Two persons had been hanged—one for having taking up against the troops at the Josa Gate, the other for having had two muskets in his store, and having been seen with the insurgents in the street Bottonato.—Distributors of seditious publications ere threatened with death. The reported seizure of arms and arrest of Hungarian soldiers, is contradicted. Gen. Gyulai, Military Commandant of Lombardy, had courteously received the deputation of Milanese citizens who besought him to adopt more lenient measures, but he had but little hope that the Government would relax its severity. The Municipal Treasury of Milan had paid the forced contribution of 40,000 florins, and is, in addtion, ordered to pay 20,000 florins every Wednesday until further orders. Fresh troops continue to arrive. In addition to the Hungarian regiment Schwartzenberg, which goes direct to Ancona from Trieste, a second is on its way to Italy. The Trieste *Gazette* says, that a man was poignarded in Milan Cathedral, during sermon on the 13th, and that the lower classes are much excited, but that no apprehensions need be entertained of a fresh out-break.

Singing is forbidden in the churches of Milan until further orders. Twelve thousand cwt. of lead has been sent from Austria for bullets, and 550 ducats from the Emperor as a "gratification" to the wounded soldiers.

AUSTRIA AND HUNGARY.—The London *Advertiser* announces the discovery of a very extensive and well organized conspiracy in Hungary against the Austrian rule. Italian letters say that there now circulates in Hungary a proclamation signed by Kossuth, granting a general amnesty to all those persons who were formerly opposed to Hungarian independence. It appears that regular guerilla bands are forming all over the country, and that "*things do not look well.*"

It is added, from Austrian sources, that the Government is perfectly well informed of what is going on, and that arrests are continually but quietly taking place. It is also added that the Austrian forces now on the Bosnian frontiers will be made to serve a double purpose: one part will guard the frontiers, while the other, formed into flying corps, will scour Hungary.

A telegraphic dispatch from London to Liverpool, and telegraphed to Halifax per last arrival, mentioned that an attempt had been made to assasinate the Emperor of Austria. It appears, at all events, that the wound was slight, although accounts differ as to whether it was inflicted by a poignard or a pistol-shot. The first dispatch stated that the Emperor had been fired at and slightly grazed by a bullet in the nape of the neck. The next account said that, as the Emperor was walking on the Bastion, at Vienna, Friday, 18th, a Hungarian, named Lebeny, leaped upon him, and attempted to stab him in the throat, but succeeded only in inflicting a scratch under the ear. Lebeny was instantly seized. A third account says that the Emperor was fired at with a musket, and that the wound is not so trifling as was at first thought. Latest dates from Vienna, 20th, says that his Majesty was going on well; that the assassin was a tailor, named Lassobenueny; and that he was killed by the Aides-de-camp. There is a curious mystery respecting all the details of this attempt.

A Vienna letter reports, but the statement is not confirmed, that Austria had addressed an "energetic" note to the English Government, complaining that Mazzini and Kossuth are allowed to get up conspiracies in London, and to publish proclamations in the English journals of a nature calculated to excite insurrections on the Continent.

A grand *Te Deum* was sung on the 20th, in the Cathedral at Vienna, for the escape of the Emperor from assassination. At the moment of the attack on the Emperor, Count O'Donnell, the Aid de Camp in attendance, struck the assassin with his sword and brought him to the ground. He was then secured.

The Dollar Mark.—$.

In the Merchants' Magazine were published several statements as to the origin of the dollar ($) mark. The N. O. Commercial Times publishes the following from a correspondent, and expresses the opinion that it is most likely to solve the difficulty. Here it is:—

"I have observed in several public prints, some amusing attempts to make a mystery out of a very simple matter—I mean the dollar mark or prefix. One paragraph derives it from an abbreviation of a representation of the pillars of Hercules, which are supposed to be represented upon the Spanish dollar. Another makes it an abbreviation of the words United States. The true derivation of it is the figure 8. The Spaniards, from whom we derive the dollar, count by reals—as the French do by francs. A real is in value twelve and a half cents, or one-eighth part of a dollar. Any one who has read Gil Blas or Don Quixotte, will recollect the phrase "piece of eight," which is frequently used by the authors of those works.—This term, then, means nothing more than a dollar, or 8 reals. When, therefore, the dollar became generally used, the figure 8 was prefixed to express dollars, and in the process of time the 8 has been changed to the present mark. It has been asserted, but I know not whether correctly or not, that General Hamilton first used this mark, soon after the adoption of our currency of dollars and cents. However this may be, the figure 8 is, no doubt, the original of the mark, and the derivation I have given above, the correct one."—*Sheldon's Detector and Reporter.*

JUDGE HUBBELL, IN WISCONSIN.—The following remarks made by Mr. LaDue, of LaCross, on the motion to amend the report of the secret committee, shows plainly, the extraordinary course pursued, in the name of the State and of Justice! to spread out charges against the Judge. We quote from the Madison Argus and Democrat:

Mr. LaDue favored the amendment. He was in favor of it because he believed it was but proper for this body to extend to the accused the privileges and benefits to which a liberal and impartial construction of the laws entitle him. He was entirely opposed to that portion of the report recommending the removal by address, not only because he did not believe the charges (if true) came within the intendment of the 13th section of article 7, of the constitution, but because he believed it was calculated to bury up in oblivion, and to disgrace the legislature for the purpose of disgracing a person who might be innocent.

Vague unsubstantiated charges were made against Judge Hubbell some five weeks ago, and *unaccompanied by any responsibility*, were referred to a select committee over a more reasonable proposition to refer to the judiciary. *Before this select committee the investigation had been prosecuted, on the part and at the expense of the State, by an attorney and informer who were enemies of the accused, and now the House must determine whether we were willing to expend the power, money, and influence of the State, to create a public sentiment against one of our citizens, and then remove him from office upon that sentiment, without allowing him an impartial trial by a proper tribunal, to which he was entitled by another clause of the Constitution, and which was allowed to the lowest and deepest in iniquity.*

When the report was first presented to the house, he moved to lay it on the table and print with the utmost secresy, but the reading was called for—they had been read and spread far and wide, and every principle of law now demanded that these charges should be substantiated or disproved, in lieu of demanding the accused to prove himself an honorable man, before he had been known to be otherwise. The only alternative therefore was to find a bill of indictment, on the *ex-parte* testimony already presented, and present the impeachment to the Senate, the constitutional court for such cases and let that court determine as to his guilt. If he was guilty he should suffer the penalties of the law; if not let the obloquy rest on the heads of his accusers.

We learn that Judge Hubbell, as soon as he saw the charges in print, proceeded to Madison, and advised the Assembly of his readiness to submit to a trial, on each and every one of them. He asked only an open, legal investigation, before a fair tribunal.—*Milwaukee News.*

☞ The question "why printers did not succeed as well as brewers?" was thus answered: "because printers work for the head, and brewers for the stomach, and where twenty men have a stomach, but one has a head."

The Jury Committee reported in favor of allowing the following bills for guarding the jail: M. H. Pike, R. Pinkerton and H. B. Page, $83 each.

THE VERDICT AS TO SETH PAINE.—Yesterday morning Judge Dickey took his seat to hear the verdict of the Jury in this case. The Jurors stated that they were unable to agree, and that there was not the least probability of their doing so. It appeared from what was said that about twelve o'clock on Wednesday night the Jury sent a message to the Judge stating that there was no prospect of their agreeing on the verdict, whereupon the Judge ordered their dismissal. The messenger, however, and the Jury too, understood that they were to assemble again yesterday morning to render their verdict.—Judge Dickey stated that he did not expect to find them there, but since they had assembled, and as it was most desirable that a verdict should be rendered, he would leave them for a while longer, trusting that they would be able to agree. Upon which the Jury looked somewhat sold, and were again locked up. During the day the following verdict was returned: "The evidence has convinced the jury that Seth Paine's previous conduct has been the result of partial insanity; but as the charge of the court was as to his present state, they are not convinced that he is now insane and incapable of managing his business; and we, the jury in this case, have found Mr. Seth Paine sane from the commencement to the termination of the trial."

CHICAGO SUPPLYING CINCINNATI WITH MANUFACTURED GOODS.—As a proof of the progress Chicago is now making in manufacturing operations, Davis & Snow, Wire Workers, in this City, have just received an order from one firm in Cincinnati, for 600 feet of Wire Cloth for flour screens. The good people in Cincinnati, sometime ago, little thought Chicago was destined to supply them with manufactured goods.

CITY SEXTON.—We are pleased to see that Mr. A. McCLURE has been re-elected City Sexton.—The vote in Council was almost unanimous, which is a substantial compliment to, and appreciation of the faithful manner in which he discharged the duties of the office.

A GOOD JOKE.—It is currently reported that on Sunday night last Mr. I. B. Eddy when he arrived home and saw that all preparations were made for a journey with him to Utica, suddenly disappeared, since which time his friends have not been able to learn his whereabouts. It is now stated that on Monday morning he posted to Utica, called up the faculty there, stated that some portion of his family had got up a clandestine trial on his sanity; by *ex parte* evidence obtained a verdict, taken his property, and were taking measures to have him confined; that he had come there unknown to his friends; that the faculty might thoroughly examine his state of mind and report accordingly; that the faculty did so, were perfectly satisfied of his sanity, gave him a certificate to that effect, and that he is now on his way home. If this be correct, and we have it on good authority, it is the next best thing to the crazy man causing his conductor to be confined in the asylum.

WOOD.—Those who are buying wood now-a-days, will find it to their advantage to call at the yard of E. W. Herrick, who has a large supply on hand. See advertisement in another column.

SAD RAILROAD ACCIDENT.—On Friday an accident occurred on the Pennsylvania Central Railroad, by which four persons, one woman and three men were killed, and one man dangerously wounded. An engine of a freight train got disabled in a deep cut near Huntington. The eastern and western trains were nearly due, the conductor sent a brakeman to warn the western train and went himself to notify the eastern. The brakeman stopped and fell asleep, the train entered the deep cut and came in contact with the freight train, with the sad results above stated.—*Cleveland Herald.*

☞ For some time the citizens of Ashland have been petitioning the Council of their village for the passage of an ordinance prohibiting the sale of liquor, and on Monday last the Council defeated the measure. The ladies assembled, and on Tuesday evening some thirty of them, well backed by the gentlemen, proceeded to the grocery of Anthony Jacobs, and asked him to discontinue the sale of liquor and the use of a "bagatelle" board which had enticed many of the youth and some of the married men from their business and their homes. He refused compliance, and the ladies chopped the "bagatelle" table into kindling wood, and emptied his liquors. They then visited another grocery and a tavern, both of which capitulated. Mrs. Witz, better known as "Mother Younkers," was obstinate, and the spigots were pulled from her whisky barrels. Not a drop of the "cratur" can now be found in Ashland, and the determination is that this state of things shall continue.—*Clev. (O.) Her.*

CURIOUS PHENOMENA OF MIRAGE.—In various parts of our western county the phenomena of mirage is frequently seen. At the head of Lake Superior, sail vessels which are really thirty miles off, are seen flapping and bellying about almost within touch. Turreted islands look heady and toppling toward the zenith. Forests seem to leap from their stems and go soaring like thistles for the very sport of it. The Chippewas call the country the Spirit, or enchanted land. An officer writing from the Arkansas region, one hundred and forty miles from Council Grove says: "Looking forward in the distance, one could swear that a beautiful lake, surrounded by tall trees, would soon be arrived at, where we could camp under refreshing shade, and bathing in pure and delightful water—an illusion, however, too soon dissipated, as mile after mile showed the same interminable waste, with no friendly tree to rest the eye upon; nothing but the droves of buffalo, and an occasional antelope, to break in upon the monotony of the scenery. The buffalo, when at a great distance in advance, would seem like elephants, "looming up" enormously."

OF

"THE CHRISTIAN WITNESS."

IT is proposed to publish in Chicago, a new religious paper, to be styled, "THE CHRISTIAN WITNESS." [illegible]

The Christian Witness will be neatly printed on good paper, in a sheet nearly as large as the Journal of Commerce, at $1,00 per annum, invariably in advance. [illegible]

The Books for subscription to the capital stock will continue open until 12th inst. G. S. HUBBARD, Ag't.

TO THE MERCHANTS OF CHICAGO.

THE undersigned would call the attention of the Merchants and business men of Chicago, to the superior advantages offered for advertising their business through the columns of the *Knox County News Letter*, published at Galesburg, Ill. As it has an extensive and very good circulation, the thickly settled and rich counties comprising the Military Tract, it is believed to be the best medium by which business men can make themselves known to the numerous dealers in that section. S. G. COWAN, Proprietor.

FORT WAYNE AND CHICAGO RAILROAD.

Books for the subscription to the capital Stock of this Company are now opened and to be kept open during the present week at the Tremont House, in this city, when those desirous, are requested to call.

This Road, from Fort Wayne to Chicago, one hundred and fifty miles long, with capital stock authorized of Two and one Half Millions Dollars, is the last link in the chain of Railways direct from Philadelphia, through Pittsburgh, Harrisburgh, Canton, Massillon, Wooster, Mansfield and Fort Wayne to this city. As a great through route from Chicago to the Atlantic cities, it compares favorably with any other in distance, grades, and local traffic, and is regarded by capitalists as one of the best opportunities afforded for investment.

The entire distance from Philadelphia to Fort Wayne, will be completed this year. The preliminary surveys thence to Chicago, are made, and the Engineers are now employed in final location, so as to place it under contract this Spring, with the view of the earliest possible completion.

All the necessary Legislation is obtained from the States of Indiana and Illinois, forming a joint Stock Company from Fort Wayne to Chicago.

No efforts have yet been made to secure stock subscriptions away from the line of Road, believing it to be the interest of western men to take stock in this Road. In justice to the citizens of Chicago the opportunity is now offered to all who will avail themselves of the privilege. The Company have the assurance from the east that any deficiency that is not made up along the line of Road, will be supplied there. SAM'L HANNA, President. Tremont House, Chicago, March 8th, 1853.

Ayer's Cherry Pectoral.

FOR THE CURE OF COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING COUGH, CROUP, ASTHMA AND CONSUMPTION.

Many years of trial, instead of impairing the public confidence in this medicine, has won for it an appreciation and notoriety, by far exceeding the most sanguine expectations of its friends. Nothing but its intrinsic virtues, and the unmistakeable benefit conferred on thousands of sufferers, could originate and maintain the reputation it enjoys. While many inferior remedies thrust upon the community, have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

While it is a fraud on the public to pretend that any one medicine will infallibly cure—still there is abundant proof that the CHERRY PECTORAL does not only as a general thing, but almost invariably, cure the maladies for which it is employed.

As time makes these facts wider and better known, this medicine has gradually become the best reliance of the afflicted, from the log cabin of the American peasant, to the palaces of European Kings. Throughout the entire country, in every state, city, and indeed almost every hamlet it contains, CHERRY PECTORAL is known as the best remedy extant for diseases of the Throat and Lungs, and in many foreign countries, it is coming to be extensively used by their most intelligent Physicians. In Great Britain, France and Germany, where the medical sciences have reached their highest perfection, CHERRY PECTORAL is introduced, and in constant use in the Armies, Hospitals, Alms Houses, Public Institutions, and in domestic practice, as the surest remedy their attending Physicians can employ for the more dangerous affections of the lungs. Also in milder cases, and for children, it is safe, pleasant, and effectual to cure. In fact, some of the most flattering testimonials we receive, have been from parents who have found it efficacious in cases particularly incidental to childhood.

The CHERRY PECTORAL is manufactured by a Practical Chemist, and every ounce of it under his own eye, with invariable accuracy and care. It is sealed and protected by law from counterfeits, consequently can be relied on as genuine, without adulteration.

We have endeavored here, to furnish the community with a medicine of such intrinsic superiority and worth, as should commend itself to their confidence—a remedy at once safe, speedy and effectual, which this has by repeated and countless trials proved itself to be; and trust by great care in preparing it with chemical accuracy, of uniform strength to afford Physicians a new Agent, on which they can rely for the best results, and the afflicted with a remedy that will do for them all that medicine can do. Prepared and sold by JAMES C. AYER, Practical and Analytical Chemist, Lowell, Mass.

Sold wholesale and retail, in Chicago, by J. H. REED & CO., and sold by the Druggists generally throughout the unvsisd country.

CHICAGO, Jan. 15, 1853.

MR. SOLOMONS:—From infancy I have been afflicted with weak eyes and short sightedness, and in all my travels I have never been able to get a pair of glasses that would help me. I have had several pairs that would enable me to see more distinctly, but could never keep them on more than one half hour, from the fact that they caused such great pain. I happened to see your advertisement, by which I saw you had just imported some, and it has been my constant aim to get a pair that would benefit me, though I would try yours.

You must not think me flattering when I say they more than answer my expectations. I have not been able to read by candle light for more than half an hour at any time before I got these glasses. Since I got these I read our Sunday all day, and until ten o'clock, without experiencing the least pain, which is a thing I have not done before for years. I say this much, as I think it deserving your enterprise, and hope others may be benefitted by it.

You are at liberty to make use of my name at any time of reference. I am, sir, yours truly, J. B. PARSONS.

P. S. I forgot to mention that my wife is greatly benefitted by the pair she got, and equally pleased. PARSONS.

M'GIRR, M. D., L. L. D. Late Professor of Physiology and Chemistry, in the University of the Lake, and now one of the Surgeons to the Illinois General Hospital of the Lake.

A NATIONAL WORK.

THE WORKS OF JOHN C. CALHOUN, to be handsomely printed in Octavo Volumes. The following will be the order of publication:

1. On the Constitution and Government of the United States. (Now ready.)
2. Speeches in Congress.
3. Diplomatic papers and Correspondence.
4. His Life.

CALHOUN, CLAY, and WEBSTER are three names which will long be venerated by American citizens. Of the three, Calhoun, during the early part of his life, was perhaps the greatest favorite with the people. His highly cultivated mind, profound views of government, and his pure character, gave great weight and importance to his opinions with all parties. Of the writings and speeches of American statesmen, there are scarcely any which bear so directly upon the great measures adopted by our Government, during the last forty years, as those of the lamented Calhoun. The War, the Revenue System, the Currency, and States Rights, were subjects upon which he took a leading position, and greatly aided the decisions which were made on them. With those who took an interest in our national history, the value of the writings of our public men cannot be too highly estimated.

The works of Calhoun will follow each other rapidly from the press. All who are desirous of procuring them are invited to call at 111 Lake street, and subscribe without delay. Terms—$1.50 per volume. Volume 1st, just received by S. C. GRIGGS & CO.

SWAIM'S CELEBRATED PANACEA,

FOR THE CURE OF INCIPIENT CONSUMPTION,

Scrofula, General Debility, White Swelling, Rheumatism, Diseases of the Liver and Skin, and all Diseases arising from impurities of the Blood, and the effects of Mercury.

SWAIM'S PANACEA has been for more than thirty years celebrated in this country and in Europe for its extraordinary cures—for the certificates of which reference is made to the directions and books (which may be had gratis) accompanying the Panacea. Some of which give the particulars of cases too frightful for general publication, where the patients had been almost eaten up with Scrofula, and were deemed incurable by Physicians.

It has been used in hospitals and private practice, and has had the singular fortune of being recommended by the most celebrated physicians and other eminent persons. Among others by—

W. Gibson, M. D., Prof. of Surgery, Pa. University.
Valentine Mott, M. D., Prof. of Surgery, N. Y. University.
W. P. Dewees, M. D., Prof. of Mid., Pa. University.
N. Chapman, M. D., Prof. of Physic, Pa. University.
T. Parke, M. D., Pres't College of Physicians, Phila.
Dr. Del Valle, Professor of Medicine, Havana.
Jose Eourenco de Luz, Prof. of Surgery, Lisbon.
J. Chipman, Member Royal College Surgeons, London.
G. W. Irving, late Minister to Spain.
Sir Thomas Pearson, Major General British Army.
Gilbert Robertson, British Consul, &c. &c.

And also, the wonderful cures effected by Swaim's Panacea have for many years made it an invaluable remedy. The Panacea does not contain Mercury in any form, and being an innocent preparation, it may be given to the most tender infant.

The retail price has been reduced to $1.50 per bottle, (containing three half pints) or three bottles for $4.

Beware of Imposition.

Swaim's Panacea is in round bottles, fluted longitudinally, with the following letters blown on the glass:—

"SWAIM'S—PANACEA—PHILADA."

and having the name of Jas. Swaim stamped on the sealing wax, and written on the label covering the cork, and a splendid engraving for the side of the bottle, composed of geometric lathe work, comprising nine different dies, which have been turned for the exclusive use of the proprietor, by Draper & Co., bank note engravers of Philadelphia. In the centre is a portrait of the late Wm. Swaim, copyright secured.

Also, Swaim's Vermifuge.

A valuable Family Medicine, being a highly approved remedy for all diseases arising from debility of the digestive organs, such as Worms, Cholera Morbus, Dysentery, Fever and Ague, Bleeding Piles, Sick Headache, &c. &c. See the Pamphlet (which may be had gratis) accompanying the Vermifuge.

Prepared only at SWAIM'S LABORATORY, THE OLD STAND, Seventh street, below Chestnut, Philadelphia, and sold by all the respectable Druggists in the United States.

CAUTION TO THE PUBLIC.

Persons wishing to obtain the genuine SWAIM'S PANACEA and SWAIM'S VERMIFUGE, should be careful to observe that the name SWAIM is spelled correctly on the bottles and labels, or they may be imposed on by medicines made in imitation of them by a person bearing a somewhat similar name, well calculated to deceive.

LOCK HOSPITAL.

No. 150 Washington Street.

THE ONLY CERTAIN REMEDY FOR THE CURE OF Secret Diseases at 150 Washington street. By the strict system established at the Lock Hospital, 150 Washington st., all patients are secure of absolute privacy. The advantages of this system are too well known to need any comment. All who have any need of advice or attention from Dr. D., may confide in him with a full assurance of secrecy and certain hope of recovery. Some of the most learned and famous men in the country have been under his charge—men of genius, intellect and power—and in no instance has the strictness of privacy been violated.

Invalids must be cautioned against the illiterate and unlearned in science, who do so much injury by quackery and imposition. The Vegetable Medicines of Dr. D. are now sufficiently established, as the only certain remedy for Venereal complaints, and those who are afflicted with such complaints are seriously warned not to tamper with them, by trusting those who practice the abuse of mercury or balsam.

Dr. D. freely invites all troubled with disorders to call upon him. His charges are regulated by the circumstances of the case. No charge will be made where a cure is not effected. Dr. D. is a regular physician, having devoted many years to the exclusive study of these diseases, comprising, in their various shades, Gonorrhea, Syphillis, Impotency, Strictures, Gleet, Scrofula, diseases of the bones, &c. Nothing is needed but to call upon him, to make everything satisfactory in a moment. Such is the absolute efficacy of the method of his cure, that no question can possibly exist about it, when once an individual becomes acquainted with the wholesome and certain process. It is but for a man to say he is afflicted, and see himself cured.

The greatest point for the consideration of everybody is, to avoid all communication with persons unqualified to give them relief. Serious and dangerous consequences ensue more than the world is aware of, from the treatment of quacks and impostors.

The only certain way is to visit the Lock Hospital, or Dr. D's office, at No. 150 Washington street, and at once place yourself under his care.

☞ Office will be kept open from 9 A. M. until 10 P. M.

☞ All letters (post-paid) will receive prompt attention. Any person wishing a private room, and cured, can have it by applying to Dr. D.

DR. ATKINSON,

Confidential Physician, 207 Randolph street, corner of Franklin, continues to cure all cases of disease of a Confidential nature, with secrecy and dispatch. His charges are moderate, success certain, and conduct honorable. Private Rooms, and entrance on Franklin street. Worst cases solicited. Letters from city or country, addressed to Dr. A., box 569, P. O., will meet due attention, and medicine can be sent secure to any part.

[CERTIFICATES.]

CHICAGO, Jan. 1853.

MR. SOLOMONS: Sir—I think it no more than an act of justice to you as well as to the American community to state the spectacles I bought of you suit me well. I find my sight much improved. I can see small print with them for any length of time without fatigue to my eyes. Should my eyes continue to improve by the use of them, I have no doubt but I shall be able to read without them in a short time. Yours truly, HENRY MORE, Jackson st.

CHICAGO, Jan. 15, 1853.

MR. SOLOMONS: Sir—The benefit I have derived from the Spectacles obtained from you, induces me to express the pleasure I have received from them. They suit my sight to admiration, by candle light as well as day; I read with the same ease as when a boy; which I could not do with any other glasses I have used. It affords me the greatest pleasure to avail myself of this medium of testifying how satisfactory has been my own experience of your skill as an optician. Yours truly, A. CARTER, Monroe st.

Important to those affected with Imperfect Vision

CHICAGO, January 27, 1853.

MR. SOLOMONS—I send you this certificate that you may make known the great benefit you have been to thousands of your citizens. I called with my husband at your office on Lake st., on the 12th inst., and bought a pair of your Patent Spectacles, which you recommended. But you must excuse me when I state I had but little faith in them at that time; but am happy to inform you I have been agreeably disappointed. I have not been able to sew or write a letter for the last three years, I am now able to do both as well as I ever could in my life. If any person was to offer me a hundred dollars, I would not part with them. I feel so pleasant with them. I give you full liberty to use my name at any time, as I am sure your Spectacles have been a great benefit to me, and will be to the people of this nation. I remain yours &c., MRS. A. HAMLIN, 52 Randolph st.

MR. SOLOMONS: Sir—Having been induced to call on you from hearing of an advertisement in the Chicago newspapers headed "Sight and Hearing," I cannot refrain from adding my testimony in favor of your spectacles. I have tried almost every store in the State, and could not get any Spectacles to suit me. I have been laboring under a defect of sight for the last ten years, and for eight years have not been able to read or thread a needle, and consequently gave up all hopes of ever seeing again; but Mr. S. looked at my eyes and gave me a pair of Glasses which he recommended me to wear, and to the great delight of my husband and family, I was able to read a newspaper as well as when a girl of 18 years of age. After being nearly in darkness for eight years I am again, by the assistance of Mr. Solomons' Spectacles, in possession of good sight. RHODA M. POTTER, Kinzie street, opposite Rossal House.

MORE NEW CERTIFICATES.

CHICAGO, Dec. 14, 1852.

Mr. SOLOMONS: Sir—I have been under the necessity of using Glasses for several years, but have never found a pair to suit my eyes until I got them from Mr. S. Since that time I find my eyes much better. Wishing you every success in your undertaking. I am yours &c. C. P. KELLOGG, No. 171 State st.

CHICAGO, 25th Jan 1853.

Mr. SOLOMONS—I called at your office on the 23d day of Dec., and stated the nature of my eyes, which was very bad at that time; you suited me with Spectacles that did my eyes a great deal of good. They were very much inflamed at that time, but that inflamation has now left. I can now bear the light of sun or lamp as well as ever. I shall call on you and get another pair in case I should have any misfortune with them, as I would not be without them under any consideration. Yours truly, E. CARVER.

ASTHMA, or difficulty of breathing, is caused by a collection of morbid humors in the air cells of the lungs, which prevent them from being duly expanded—hence difficult and laborious breathing, cough, great oppression of the breast, pain in the head, and many other distressing complaints.

Wright's Indian Vegetable Pills are always certain to give relief in Asthma, because they purge from the body those humors which are the cause of every malady incident to man. From four to six of said Vegetable Pills, taken every night on going to bed, will in a short time carry off the most violent fit of Asthma, and if used occasionally afterwards, will keep the system in sound health.

NOTICE.

MR. SOLOMONS' stay in Chicago, now being limited to Tuesday, March 15 [illegible] application is absolutely necessary.

NEW DISCOVERY FOR THE EYES

SPECTACLES, &c., ground on the new principle of Spherical [illegible] by M. SOLOMONS, the celebrated Oculist, from the [illegible] Manufactory and London Optical Establishment, No. 101 [illegible]

M. SOLOMONS, the sole inventor of the Improved Spectacles, and various Improved Glasses, is now on a professional visit in this place, and may be consulted at his office, over Ward & Doggett's, 126 Lake st.

He has had the honor of attending the above named principal towns in the United Kingdom, where he has experienced the most flattering encouragement, and having been earnestly solicited to make a visit for a short time, he has the honor of announcing his arrival from London, with a most splendid assortment of his newly invented and improved Spectacles. Such is the superiority of these Glasses that persons having inflamed or weak eyes, may instantly be relieved by using them, and they possess the property of preserving the precious organ of sight to the most advanced period of life, while they enable both the old and the young to pursue the most minute employment for any length of time, both by day or candle light. As several individuals in the United States have proved their efficacy, he with confidence, solicits the further favors of the public, which he will ever be proud to acknowledge, assuring those who entrust him with their commands, that no exertion shall be wanting on his part to merit their confidence and approbation. Added to the advantages possessed by him of long practice to the Eye Infirmaries, and under one of the most eminent Oculists, by which he has obtained a thorough knowledge of the diseases of vision, he has in his possession documents from individuals of rank, conveying the highest testimonials of approbation.

He will give references to persons in the United States who have found the greatest benefit and comfort from the use of his newly invented and improved spectacles.

NEW DISCOVERY FOR DEAFNESS.

The *Sound Concentrator* is an extraordinary, powerful, newly invented small instrument, for the cure of extreme cases of deafness, entirely different in make or construction from all others, surpassing everything of the kind that has been or probably ever can be produced. They are fitted to the cavity of the ear, and may rest within without projecting, and being of the same color as the skin are not perceptible. The powers of this valuable invention are so great as to restore defective hearing of long standing, to its perfect and natural state, and to enable deaf persons to join in general conversation, to hear most distinctly at a place of worship, at the bar or any public assembly; the unpleasant sensation of ringing noises in the ear is entirely removed, and the concentration afforded to individuals afflicted with this dreadful malady all the assistance that possibly can be desired.

Chicago, Dec. 21, 1852.

I have examined Mr. G. Solomons' Glasses and believe them to be constructed upon correct principles, and well suited for all such as have occasion to use them. J. McLEAN, M. D., Professor Materia Medica, &c., Rush Medical College.

Chicago, Dec. 21, 1852.

I hereby certify that I am now using a pair of Mr. Solomons' Glasses, and I find them to answer a better purpose for near sightedness than any that I have ever used. J. W. [illegible], M. D.

Detroit, Oct. 15, 1852.

I am fully of the opinion, from careful examination and a trial of Mr. Solomons' Glasses, that they are better calculated to accomplish the object designed than any now before the public, being shaped upon philosophical principles. T. E. CLARKE, M. D.

Cleveland, Oct. 27, 1851.

It affords me pleasure to state that on the trial of several specimens of Spectacles placed in my hands by Mr. Solomons, I find myself much relieved from a defect of vision, and especially weakness of the eyes, from which I have suffered for the last two years, whenever I have exercised them even for a short period of time. I think they are of an excellent quality and peculiarly adapted for such purposes. J. P. KIRTLAND, M. D., Professor of Physical Diagnosis, and Theory and Practice of Medicine, Med. Dep. W. R. College.

Rochester, Jan. 15, 1851.

The best recommendation I can give the Glasses of Mr. Solomons, is that I use them myself and prefer them. JAMES WEBSTER, M. D., Professor of Anatomy, University of Buffalo.

New York, June 4, 1850.

Having made trial of Mr. Solomons' Patent Spectacles, and examined the principle on which they are constructed, I have no hesitation in pronouncing them superior to any with which I am acquainted, and accordingly can most cheerfully recommend them to all who need artificial aid in improving their vision. CHAS. A. LEE, M. D., Professor of Pathology and Materia Medica, Geneva, Buffalo and Bowdoin College.

Philadelphia, June 4, 1850.

I cordially concur, as far as my judgment goes, in the opinion of my friend and colleague, Dr. Lee, in reference to the perfection of Mr. Solomons' convex and oval glasses, for farsightedness. The grinding appears to be good and clear, and the general workmanship superior. JAMES BRYAN, M. D., Professor of Surgery, Geneva College.

Columbus, Feb. 2, 1851.

Having examined the spectacles of Mr. Solomons, I am fully convinced that they are of a superior quality. I have taken a pair for my own use, and find them unusually easy to the eye. R. L. HOWARD, Professor of Surgery, Sterling Med. College.

WISTAR'S

Balsam of Wild Cherry,

The Great Remedy for Consumption.

And the Best Medicine Known to Man

For Asthma of every stage, Liver Complaints, Bronchitis, Influenza, Coughs, Colds, Bleeding at the Lungs, Shortness of Breath, Pains and Weakness in the Side, Breast, &c., and all other diseases of the Pulmonary Organs.

A very important disease over which this "Balsam" exerts a very powerful influence, is that of a

DISEASED LIVER.

In this complaint it has undoubtedly proved more efficacious than any remedy hitherto employed, and in numerous instances, when patients had endured long and severe suffering from the disease, without receiving the least benefit from various remedies, and when Mercury has been resorted to in vain, the use of this Balsam has restored the Liver to a healthy action; and in many instances effected permanent cures after every known remedy had failed to produce this desired effect.

Besides its astonishing efficacy in the disease above mentioned, we also find it a very effectual remedy in Asthma, a complaint in which it has been very extensively used, with decided success, even in cases of years' standing.

READ THE FOLLOWING.

We are just in receipt of the following voluntary tribute to the curative power of Wistar's Balsam of Wild Cherry, from E. Hall, M. D., of Mt. Clemens, Michigan, who is a physician of high standing, and an extensive druggist.

MT. CLEMENS, Michigan, Oct. 20, 1848.

To all the afflicted this may certify that Mrs. B. Roberts, of this village, three or four weeks after confinement, was attacked with a violent cough and great prostration, and seemed hastening to the grave with consumption. I advised her to use Wistar's Balsam of Wild Cherry—she did so, and with that valuable medicine alone, in the space of three or four weeks, was restored to health, and is now a living proof of the value of Wistar's Balsam of Wild Cherry. E. HALL, Physician and Druggist.

Read and be convinced that further of the remarkable virtues of Wistar's Balsam of Wild Cherry.

Messrs. SANFORD & PARK—Gents: As a matter of justice to you, and for the benefit of the public, I would declare the following statement of a cure effected by your medicine, known as Wistar's Balsam of Wild Cherry. In the spring of 1847, my wife was severely attacked with inflammation of the pleura, which resulted in a deep seated pain in the right side, accompanied with a severe cough. [illegible] none of the best physicians. [illegible] for weeks she suffered without relief, coughing incessantly night and day. I came to the conclusion that all the remedies known to physicians could not help her and was induced to try your Wild Cherry. I procured one bottle, and commenced using it according to directions, [illegible] the cough stopped, the pain in her side was relieved, and with the aid of another bottle, she was restored to perfect health. In consideration of these circumstances, I would recommend it to the public as a valuable medicine. Yours, Respectfully, R. N. CARRAT.

HEAR [illegible]

From the Fall River [illegible] Monitor.

"This medicine, prepared by a long experienced and skilful physician, tested and approved by a great number of intelligent, distinguished and respectable persons in various parts of the country, is now received and used with entire confidence, and it is also recommended as a valuable medicine for other diseases, such as colds, coughs, &c. particularly those diseases whose tendency is to consumption."

From the Boston Mercantile Journal.

"This medicine, coming from a respectable source, and carefully prepared by an experienced and skilful physician, is received by the public with confidence. Its efficacy has been proved in many obstinate cases of disease, and its fame has rapidly extended. It has been extensively used in many parts of the country, particularly in the New England and Eastern States, and strong testimony from intelligent and highly respectable persons has been offered in favor of its merits as a remedy for colds and coughs, affections of the lungs, diseased liver and dyspepsia."

From the Cincinnati Daily Times.

"We would advise those of our readers who are laboring under an affection of the lungs to make immediate use of this truly excellent medicine. The most respectable and intelligent families of our city have adopted it as a favorite medicine; and persons predisposed to consumption, who have used it, speak in the highest terms of its efficacy."

NEW YORK ADVERTISEMENTS.
FROM S. M. PETTENGILL & CO.'S
ADVERTISING AGENTS,
122 Nassau Street, New York; 10 State, Boston.

Important to Housekeepers.
SOMETHING better & more economical than Soda, Cream Tartar, or any other preparation in existence, for Baking. Durkee's Chemical Yeast, or Baking Powder—For raising Bread, Biscuit, Fried Griddle and Johnny Cakes, Puddings, Pot Pies, Corn Bread, Sweet Cakes, Apple Dumplings, Pastry, &c., &c.
This article is one that every Family, Hotel, Boarding House, Eating Saloon, Ship, Steamboat, Vessel, Canal Boat, &c., will find, upon careful trial, to be the very thing needed every single day of their existence.
Its most important advantages over the old system, are—
1. It saves the expense of milk, eggs, shortening, spoiled bread, and the trouble and expense of procuring good yeast—water only being necessary.
2. No time is required for the dough to rise before baking; consequently bread may be made in a few minutes.
3. A cook can always depend upon having light, sweet, tender and palatable bread and biscuit, whether the flour be of the best quality or not.
4. Bread made by this process is much more nutritious, easier of digestion, better suited for a weak stomach, sweeter, whiter and lighter, than bread made by [illegible].
5. The bread made by fermentation does not afford the same amount of nourishment to the system, [illegible] when made with this compound; because the [illegible] contained in fermented bread, prevents the proper action of the gastric fluid upon it, and consequently, a part only goes to nourish the body, while the acids tends to produce dyspepsia and its attendant evils.
This article has been thoroughly tested, and is universally liked. When used according to the directions, it is warranted to suit.
Be careful to ask for DURKEE'S BAKING POWDER, and take no other, and you will not be deceived. Principal office 139 Water street, New York. Sold by the best grocers and druggists generally.
Agent in Chicago, J. B. DOGGETT.

We are at all times willing to exhibit our goods to buyers, whether they purchase or not; we do not consider it any trouble to show our goods.
Cash and close time purchasers are especially invited to give us a call. From our facilities, we are convinced that we can sell at [illegible] and prove satisfactory.

The Vulcan Cook Stove
WE would respectfully call the attention of persons wishing to purchase a Cooking Stove, to the Vulcan. Two years of successful experiment by an appreciating public, have stamped this as the best cooking stove in use. For economy and utility, this Stove is unsurpassed. By a peculiar adaptation and arrangement of the flues, this stove will do a greater amount of work, and in one year's time at the furthest, save more than enough over ordinary air tight Cook Stoves, in fuel, to purchase a new one. To those who have seen or used this Stove, it would be supererogation on our part to say another word in commendation. Those who are not yet had the good fortune to see this Stove, and are intending to purchase one, are requested to call immediately, for the demand is such that we cannot promise how long we will have a supply. Remember, this Stove is adapted to either coal or wood.
WM. KENNEDY & SONS, 180 Lake st.

DURYEE & FORSYTH'S SCALES.
THE subscribers, thankful for the very liberal patronage of the Public, take this method to announce that they have recently received from the celebrated Manufactory of Duryee & Forsythe, of Rochester, a full assortment of Scales, Sugar Mills, Copying Presses, and Warehouse Trucks, and in view of the extensive machinery, they have been enabled to introduce in the manufacture of their Scales, they have made a great reduction on former prices, being determined to sell at such prices as will command the trade. All the scales manufactured at this establishment, are made under the immediate supervision of Mr. Duryee, who is a practical mechanic of long experience in the manufactory of weighing machinery, and may be relied upon as being made of the best material and of superior workmanship. The bearing edges are made of the best cast steel, well tempered, and great care taken in their adjustment. We will warrant these Scales to be accurate—to be as strong, as durable, and as well finished in every respect, as any Scale in this market, and at prices that will make it an object to those wishing a good scale to buy of us. Their works are extensive, and their machinery, and other facilities for manufacturing, are equal to the best at the East, and they are determined to make their prices and terms as favorable, and the style and quality of their work as satisfactory, as can be found at any similar establishment in the country.
They take the liberty of referring to J. B. Turner, President and Superintendent, and John Van Nortwick, Chief Engineer on the Galena and Chicago Union Railroad Co.

FAIRBANK'S PATENT
PLATFORM AND COUNTER SCALES
FOR SALE at Manufacturer's prices, by C. L. HARMON & CO., 107 South Water street, Chicago, and by B. H. CHADBOURN, Agent.
STATE OF NEW YORK, CANAL COMMISSIONER'S OFFICE, ALBANY, June 21, 1852.
Messrs. E. & T. Fairbanks & Co.—Gents.—Your favor of the 10th, asking my views of the Weigh Lock Scales manufactured by you, and introduced upon the Erie Canal, is duly received.
In the report of the Canal Commissioners, submitted to the Legislature 1st of January last, I took occasion to express my satisfaction with your Scales, and have since seen no reason to change my mind.
I have no hesitation in saying that they have fully answered your recommendation in every particular. The capacity for strength is fully equal to sustain the required burthen—they are not liable to get out of order or repair—the arrangement of the Weighing Beam is admirably adapted to obtain rapid results. I know of no scale superior to them, in this or any other country.
I am, yours truly,
JNO. C. MATHER, Canal Commissioner.

Mathematical and Classical School,
FOR MALES AND FEMALES,
(OPPOSITE THE CITY HOTEL,)
56 Lake Street, Chicago, Ill.

THE THIRD TERM will commence on Monday, February 21st.
This Institution, of more than three years standing, affords facilities for a thorough English and Classical education.
Young men may here fit themselves for business, or for advanced classes in College, in much less time, and at less expense, than in any other Institution in the West.
Students have been taught to solve mentally the most intricate problems in Arithmetic and Algebra in a single term. They are taught how to exercise their faculties to think and reason—to make their minds familiar with principles—to analyze and combine subjects—grace, cause and effect—in short, to acquire mental and moral power to apply to the machinery of human life.
The Principal has had fifteen years successful practice in his profession, more than ten of which he has been at the head of flourishing Academical Schools in the East and South.
The number of pupils is limited to 60, and not more than 20 pupils will be assigned to each teacher. Students are admitted at any time, but will never be charged for less than half a term.
We desire no application except such as wish to improve, and are willing to be prompt and regular in attendance and attentive to business.
Doors open to visitors at all times.

Chicago Piano Forte Manufactory.
C. KNAUER & SON,
Piano Forte Manufacturers, 131 & 133 N. Clark St.,

THAT which was an experiment a year or two since, is now a fixed fact, the permanent establishment of a
PIANO MANUFACTORY IN CHICAGO.
The experience of the advertisers in their business in Europe and in this country, have enabled them to fully demonstrate, with economy and perseverance, that Musical Instruments of the Most elaborate kind, in general use, can be and has been manufactured in Chicago, which in volume, tone, finish and general perfection equals any thing brought from the East. To prove this we refer to those in this city and neighborhood who have purchased from us and now use them, all of which having given the utmost satisfaction.
That nothing may escape their attention in the way of style or improvement in their line, one of the Proprietors visited the East a few weeks since, to examine any thing new which has been adopted there, and has returned fully prepared to exhibit them to their customers and the public.—They invite particular attention to the new styles of Grand Square Piano.
Persons wanting Organs, Pianos, or any other Musical Instruments in their line, will find it to their advantage to call and examine our stock and prices, as we are confident that we can furnish in quality and style, as good as can be had in the East at prices much lower than they can be brought here.
